SUMMARY

Second-year BTech Computer Science (Data Science) student at Mar Athansius College of Engineering with strong foundations in Python, MySQL, and web development. Built real-world applications including a finance tracker and an AI-based study tool. Interested in backend development and data-driven problem solving, and looking for opportunities to apply technical skills in practical environments.

EDUCATION

- B.Tech in Computer Science and Engineering (Data Science)
  Mar Athanasius College of Engineering
  CGPA: 9.93

- Senior Secondary Education (Class 12)
  De Paul Public School, Thodupuzha
  Percentage: 97.6%

- Higher Secondary Education (Class 10)
  De Paul Public School, Thodupuzha
  Percentage: 93.8%

PROJECTS

Company Management System | Python, MySQL
- Built a CRUD-based employee and company management system
- Integrated MySQL database for efficient data handling

Study Compressor
- Developed an AI-powered tool to convert notes into summaries and quizzes
- Improved study efficiency using automated content generation

Ledger – Personal Finance Tracker | Streamlit, Supabase
- Built a real-time expense tracking web app with dashboards
- Implemented cloud storage and data visualization for spending insights

TECHNICAL SKILLS

- Languages: Python, C, Java, SQL, HTML
- Database: MySQL
- Concepts: Object-Oriented Programming, Basic Data Structures
- Tools: VS Code, Github , MySQL

ACHIEVEMENTS & ACTIVITIES

- Completed Forage job simulations in Data, Deloitte, and Skyscanner
- Participated in Google Developer Groups (GDG) Study Jams
- Solved coding challenges on HackerRank (Python, Java)
- Participated in TinkerHub Hack 4.0
- Secured 3rd Prize in DataQuest (GDG MACE)

STRENGTHS

- Strong academic consistency
- Problem solving
- Team player
- Quick learner
- Self-motivated and proactive
